## Career and Mathematical Application Investigation Project

Scenario: During a field trip, you and your classmates attend a community job fair event. Many Human Services-related occupational careers are represented at the job fair. Upon returning to the classroom, the teacher assigns a group project to analyze mathematical applications in Human Services occupations.
--

Write the selected card and the Human Services Careers Pathway:
Example: Cosmetologists are in the career pathway of Personal Care Services.

Instructions:

- As a group, create and present a five- to seven-minute oral presentation to the class, using at least one prop.
- The presentation must include information about how mathematics is used and applied within the career you selected.
- The conclusion will include a demonstration of at least one way in which mathematics could be used in your Human Services career.

Project will be assessed with Rubric for Oral Presentation.
