## Engaging Students

You are a teacher now. What grade and subject are you teaching? For each of the following situations describe how you will engage your students to keep them interested in the lesson and learning.

<b>Situations</b>	<b>Keeping Students Engaged</b>
The topic you are teaching doesn't seem to interest students or have relevance to them.	
Some students tend to yawn and drift off during lectures.	
Some students are texting or social networking during class instead of doing the assignment.	
Some students finish activities before their classmates and resort to talking and disturbing others still working.	
A lesson ended earlier than you expected.	
There is a pep rally today and the students are excited and are having a difficult time concentrating.
